Judson University Mission

Judson is an evangelical Christian college that represents the Church at work in higher education, equipping students to be fully developed, responsible persons who glorify God by the quality of their personal relationships, their work, and their citizenship within the community, the nation and the world. Through a broadly based education in the liberal arts, sciences and professions, the college enables its students to acquire knowledge and concepts that sharpen their insights, develop skills appropriate to their career goals, and develop the relationships and the commitment for lifelong learning. The Judson community experience challenges graduates to be decisive leaders and active participants in church and community. 

Program support the following values that guide our program:
- Unity: We value the balanced coexistence of Christian faith and intellectual life.
- Stewardship: We value cultural diversity and will encourage its understanding in our community. We respect God’s creation and strive to make good use of the natural world. We will assist each person to achieve and maintain spiritual, personal and professional goals.
- Relationships: We value human relationships and are dedicated to nurturing friendships and links with the faculty, staff and students of the Architecture Program.
- Excellence: We value the highest quality performance in building the kingdom through educational preparation.
- Service: We value service to humanity as an outgrowth of our submission to the Lord and in his desire that we help one another.
- Leadership: We value leadership and opportunities to model biblical truths within our communities.
- Professional Standards: We value the balanced coexistence of Christian faith and professional life.
- Education: We value knowledge and understanding about buildings and places that can be shared and be used, which is the activity of our professional mission. We respond to our position within an academic setting by valuing preeminently the formation of critical minds toward the various approaches to architecture. We will prepare students for practice by allowing them to develop and follow an approach that is consistent with the critical position they develop in their liberal study of architecture.
- Spirituality: We value cultural diversity and will encourage its understanding in our community. We respect God’s creation and strive to make good use of the natural world. We will assist each person to achieve and maintain spiritual, personal and professional goals.
- Relationships: We value human relationships and are dedicated to nurturing friendships and links with the faculty, staff and students of the Architecture Program.
