How do I search for books about my topic?

1. Go to the library website at [http://www.judsonu.edu/library](http://www.judsonu.edu/library)
2. Click on the link for *Judson Library Catalog*.
3. In the search box, type your keywords. You cannot use quotation marks, parentheses, or truncation in the Judson Library Catalog. If you want to use Boolean operators, click the *Advanced Search* link.
4. Once you have your search terms typed into the boxes, click *Find*, and then the result list will appear.
5. To arrange the result list so that the newest books are on the top of the list, choose *Newest First* from the drop-down menu next to *Sort*.
6. To limit to books within a certain collection in the library, under Location choose the option that you want (like *Art/Design/Architecture*, *Children’s Literature*, *Reference Collection*, or *Circulating Book Collection*).
7. Click on links that have the book titles to get more information about the books.
