### Printing from External Memory

1. If the file is not already a PDF, save a copy of it as a PDF.
2. Log in at the printer/copier.
3. Plug in the USB flash drive.
4. Press "Print a document from External Memory."

5. Select the document you wish to print and press "Print".

6. Then, press "Start". (Don't forget to remove your external memory when done).
