

JUDSON UNIVERSITY

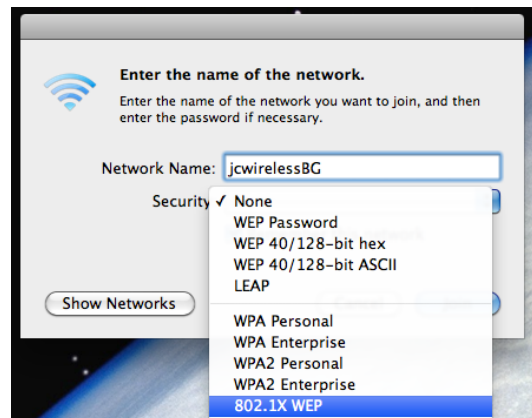

Information Technology Department

Setup for Connecting to the Judson Wireless with Apple's OS X

1. Turn on your airport, then select "Join Other Network..."

2. For Network Name, enter *jewirelessBG* (case sensitive), then select "802.1x WEP" from the "Security" drop-down menu.

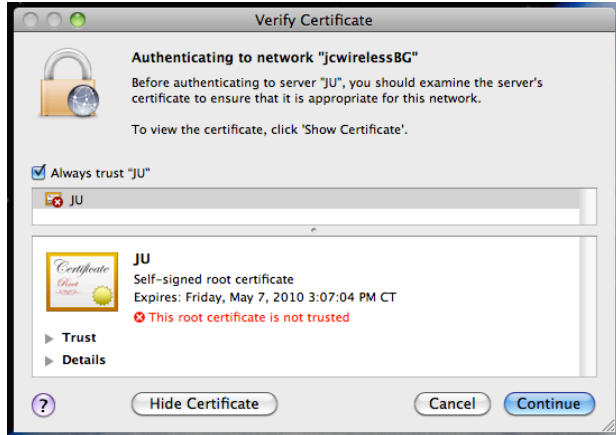

3. In the authentication area below, enter your Judson username and password. Leave 802.1x as "Automatic," then check the "Remember this network" box and click "Join."

- The window shown at right should pop up. If it does not, turn your airport off and back on.

- Once you see the “Verify Certificate” window, click the “Show Certificate” button and check the box next to “Always trust,” then click “Continue.”

- At the next password prompt, enter the username and password for your personal computer. *This is your computer login, not your Judson login.*
- Open your browser and login to Websense if necessary.
